Education

B.Tech, Computer Science, Sitare University

Course Completion - May '27

Relevant Coursework: Python Programming, Java Programming, Object Oriented Programming Concepts, Advanced Data Structures and Algorithms, Artificial Intelligence, Database Management Systems, and Machine Learning, C Programming, Search Engine Information Retrieval.

GPA: 7.85

Technical Skills

Programming Languages: Python, Java, JavaScript, C

Web Technologies: HTML, CSS, Flask, React.js, Django

Database Management: MySQL, PostgreSQL

Tools and Technologies: Linux, Pandas, Numpy, Git, GitHub, Flourish, Selenium, Power BI, Matplotlib

Projects

AI Inventory Insight System – Demand Analysis & Recommendations

Developed an AI-based tool to analyze sales data, identify demand trends, and generate actionable restocking recommendations. Combined data analytics with AI-generated insights to support business decision-making.

Tools & Technologies Used: Python, Pandas, Matplotlib / Chart.js, OpenAI API

AI Sales Copilot – Email & Workflow Automation

Built an AI-powered assistant to generate personalized sales emails, follow-ups, and meeting summaries using prompt engineering. Automated repetitive communication tasks with tone-controlled outputs, improving efficiency and reducing manual effort.

Tools & Technologies Used: Python, OpenAI API, Prompt Engineering

Nexus – Intelligent Search System

Developed a full-stack expense management application to track and analyze user spending patterns with category-wise insights and interactive charts. Enabled data visualization and report generation for better financial decision-making.

Tools & Technologies Used: HTML, CSS, JavaScript, Flask, Chart.js, PostgreSQL

CalcInterpreter – Custom Expression Interpreter

Built a full-stack project management platform with JWT authentication and role-based access, developed RESTful APIs for task tracking, project organization, and user management, and designed a modular Spring Boot backend with a responsive React frontend to enhance usability and performance.

Tools & Technologies Used: Spring Boot, Java, React.js, JWT Authentication, MySQL/PostgreSQL, REST APIs

AI Operations Assistant – Internal Knowledge Chatbot

Created an AI chatbot to answer business queries using company documents, enabling faster information access. Designed prompt-based responses to ensure accuracy and reduce dependency on manual support.

Tools & Technologies Used: Python, OpenAI API, NLP

Scholarships

100% B.Tech CS Scholarship, Sitare Foundation

Aug '24 - Present

100% GAIL Super 100 Scholarship, CSRL

Jul '23 - May '24
